

REFERENCE – Pool CRYSTAL NTE SA, Lausanne, Switzerland EWO-sales partner Stephan Brun

CRYSTAL NTE

products: VITAL

“For years we have used chemicals (chlorine) in our pool to disinfect and keep the pool water clean.

Some time after the start of the partnership with EWO, we also stopped chemical water treatment in our pool.

Instead of chlorine, we now use a UV system to reduce germs.

In connection with the EWO system for creating a natural balance in the water, we have already achieved great success in the first year of use.

Despite the relatively high temperatures of the water in the pool and the frequent use by our grandchildren, we had no problems with the water.

ewolution of water

*As can be seen in the photos, the water in the pool was and is always clean and clear.
Since then there have been no complications with algae either.*

*With this combined, natural system, we are convinced that we have taken a step
towards the right method, which allows pure bathing fun without chemicals.
Cleaning the system was also much easier with this system than before.*

We are just completely satisfied!"
